I'm a full-stack web developer with experience building both the front-end and back-end of web applications. My primary experience is with JavaScript, NodeJS and React, but I am highly interested in Python as well. In my previous career as an environmental scientist, I worked with a passionate team where we developed solutions to complex remediation problems. Being a builder at heart and a passionate problem solver allows me to excel in a developer role.

EXPERIENCE

- **Sargent Consulting – Sole Proprietor** 07/2019 - 02/2021
 - Analyzed data and synthesized information into reports for multiple large-scale CERCLA remediation projects.
 - Assisted with successful completion of Phase I and II Environmental Site Assessments.
- **CSI Environmental, LLC – Environmental Scientist** 07/2016 – 06/2019
 - Performed technical work in operation and management of an in-situ experimental groundwater remediation system at EPA's NPL site OU2 using ozone and flocculation/dewatering to treat chlorinated hydrocarbon contamination.
 - Contributed to the successful EPA-approval of Remedial Investigation and Feasibility Study (RI/FS) for a Region 2 CERCLA project superfund site in which a ROD was granted.

CERTIFICATES AND TECHNICAL SKILLS

Certificate of Full-Stack Web Development

University of Denver

Languages: JavaScript, CSS, HTML, SQL

Applications: GitHub, MySQL, MongoDB

Tools: React, Node, Handlebars, Query, Bootstrap

PROJECTS

Git Outside | [GitHub](#) | [Live Link](#) – Back-end & Front-end developer. This application allows users to read and write reviews about their favorite campgrounds. Utilized JavaScript, MySQL, and Handlebars.

Dine-In | [GitHub](#) | [Live Link](#) – Back-end developer. This app generates a random recipe based on input from a user by pulling data from 3rd party API. Utilized JavaScript.

Weather Dashboard | [GitHub](#) | [Live Link](#) – Sole Author. This application renders weather data from a 3rd party API based on user input. Utilized JavaScript and Bootstrap.

EDUCATION

Bachelor of Science in Biology

University of Maryland, College Park
